Abstracts

Metaera is a high-performance, scalable, EVM-compatible, and secure smart-contract platform. Metaera's mainnet deployment—Metaera Opera—is built on Metaera's consensus mechanism, Lachesis.

Metaera is a leaderless, asynchronous, and byzantine fault-tolerant Layer 1 block chain protocol.

Lachesis enables Metaera to deliver fast transaction speeds, low transaction costs, and deterministic finality. This is achieved while remaining permission less, decentralized, and open-source.

When we set out to change the game, we knew we had to do something bold. Our goal was straightforward: create a charitable cryptocurrency paired to a marketing strategy so brazen it is nearly unbelievable - allowing user adoption to achieve record levels.

When we bought our first Lamborghini, the idea clicked. We would change the world by creating a token that makes people happy and fulfills lifelong dreams, while filling a wallet of a different kind - the "METAERA" wallet.

The idea is simple: a token that gives others the same happiness we experience in owning our dream machines, all while giving back to our community.

Thus, METAERA was born. We are a Binance Smart Chain token, with a unique 10% transaction tax that is split into three pools:

- Automatic holding reward
- Liquidity
- A fund that donates to charity and buys cars for giveaways to spread the word

It sounds crazy and it is. But, we like crazy. We hope you do too. In this whitepaper, you will find more information on the specifics of our token. We hope it answers all your questions. However, should you leave with any lingering questions, please feel free to join our Telegram group and we will try our hardest to answer them.

-METAERA Dev. Team

Roadmap

Token Ecosystem

Metaera

MEC is the native token of the Metaera and is used to secure the network through staking, pay for fees, and provide a basic unit of account between the multiple sub networks created on the Layer-1 Block chain platform.

Metaera is a high-performance, scalable, EVM-compatible, and secure smart-contract platform. Metaera's mainnet deployment—Metaera Opera—is built on Metaera's consensus mechanism, Lachesis. Metaera is a leaderless, asynchronous, and byzantine fault-tolerant Layer 1 block chain protocol.

Pancake SWAP

Pancake Swap is a Binance Smart Chain Decentralized Exchange (DEX) for swapping BEP-20 tokens.

To enable METAERA buying and selling, Pancake Swap offers our community the ability to exchange their BNB for MEC.

Binance Smart Chain

The Binance Smart Chain (BSC) is a block chain network that runs in parallel to the Binance Chain. In contrast to the Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM).

The Binance Smart Chain offers our community the added interoperability of facilitating their investments through Ethereum-based wallets, such as MetaMask.

An added advantage of issuing METAERA tokens on the BSC is that it offers our community an affordable block chain experience through smaller transaction fees compared to the Ethereum Network.

Core Values

Be magical.

We are positive and kind above all else. Our main goal is to create happiness in other lives.

Be charitable.

We strive to be as giving as we can possibly be, helping out our community as much as we can.

Be sustainable.

We make decisions that are based on our long term health, not the short term gain.

Be transparent.

We strive to be open and honest with our community at all times, for the benefit of all involved.

Potential Use Cases

Layer-1 Platform

A Layer-1 block chain is the base level of the block chain architecture. Layer-1 block chains validate and execute transactions without support from another network, and reimburse transaction fees with crypto currencies.

We research layer 1 block chain protocols to provide the most accurate, up-to-date information on all of them and make this the easiest way for you to get to know and use them.

Almost instant transfers

Transactions on Metaera are finalized in a second and cost a fraction of a cent.

Simply secure

Metaera's validator nodes form a global, trustless, and leaderless Proof-of-Stake network.

Highly scalable

Metaera can process 1 Lakh transactions per seconds and scale to thousands of nodes.

Ethereum compatible

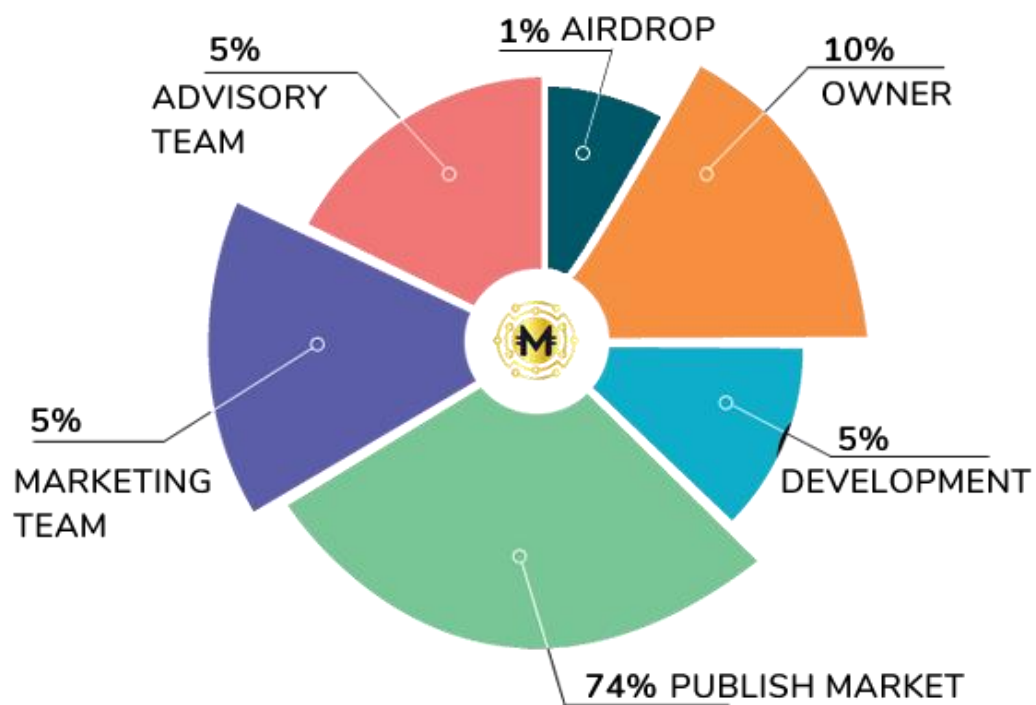

Metaera is EVM compatible. Deploy and run your Ethereum dApps on Metaera.

Tokenomics

Token Distribution

Token Emission

SR.	Token	Emission Rate
1 st Year	7 000 000	14%
2 nd Year	5 000 000	10%
3 rd Year	5 000 000	10%
4 th Year	5 000 000	10%
5 th Year	5 000 000	10%
6 th Year	5 000 000	10%
7 th Year	5 000 000	10%

Total Token
50 000 000

Initial Supply

(74%)

Dev. Team

Brad Butcher

Dev Team

Professional poker player, philanthropist, and veteran cryptocurrency investor.

David Butcher

Dev Team

Entrepreneur, philanthropist, and veteran cryptocurrency investor - founder of 7-figure businesses.

Ohio State University graduate. Named Top 25 Entrepreneurs in the USA (2017+2018).

+ Many other mods, dev. team assistants, and marketing gurus!

+ Huge thank you to our support team.

Marketing Strategy

Influencers

We are actively reaching out to (and funding when needed) partnerships with influencers in the crypto, poker, and supercar communities to share informational posts about METAERA, announcements of giveaways, and memes/funny content to peak interest in the project. Examples of this so far have been WallStreetBets, BSC100X, CryptoCollabs, and Shaun Fiest.

Physical + Sponsorships

This portion of our marketing plan is what we consider “boots on the ground.” We plan to have billboards in multiple cities worldwide (for the attention in those places but also the pictures of them to post online) and ads on Poocoin, etc. We will have merch available on our website and given away to fans. We will give stickers for fans to put on cars and even sponsor drivers of unique cars and supercars.

We will sponsor events such as poker tournaments, car events such as Cars and Coffee, and more.

Giveaways + Charity

Our concept is inherently attention-grabbing, but to ensure we are utilizing our giveaways to the fullest they will be live streamed (also increases legitimacy) and video content will be made of these events that extend the time of hype (ex. YouTube video “We just gave away a Lambo!”). We will partner to create social posts with the charities we donate to let everyone know the good deeds of our community.

Social Media

MEC is dedicated to having impeccable content on social media, including hype videos, memes, and other shareable content. We have a network of professional creators that are assisting us in fulfilling this mission.

+Many more surprises along the way
